Mitchell Gray

SENIOR SOFTWARE ENGINEER | AI/ML ENGINEER

Woodstock, Ontario, Canada · mitchell.gray.3313@gmail.com · linkedin.com/in/mitchell-gray- · github.com/DevsmileGod

PROFESSIONAL SUMMARY

Senior Software Engineer with nine years of experience building web applications, backend services, and, for the past several years, AI and machine learning systems. Has shipped LLM-powered applications, multi-agent workflows, ML pipelines, and multimodal features into production. Full-stack foundation in Python, JavaScript, and React, with a clear understanding of how models fit into the APIs, databases, and frontends around them. Currently an independent consultant helping businesses design and build custom software, AI agents that automate repetitive workflows, and third-party API integrations, from requirements through deployment and ongoing support.

TECHNICAL SKILLS

Core & Consulting: Python, LLMs, AI Agents, RAG, Full-Stack Development, REST APIs, Solution Architecture, Client Consulting

AI & Machine Learning: Machine Learning, Multi-Agent Systems, Multimodal AI, MLOps, ML Pipelines, Predictive Modeling, NLP, Generative AI

Engineering & Leadership: Backend Development, Data Processing, API Integration, Software Architecture, Automation, Code Review, Technical Leadership

PROFESSIONAL EXPERIENCE

Independent Software Engineer and AI/ML Consultant

August 2026 – Present

Self-Employed · Woodstock, Ontario

- Design and build LLM-based agents that automate business workflows and reduce manual effort.
- Deliver end-to-end custom software engagements spanning requirements, architecture, development, testing, deployment, and ongoing support.
- Develop full-stack applications, backend services, and third-party API integrations for clients across industries.
- Apply generative AI and retrieval-augmented generation (RAG) research to production client solutions.

Senior Software Engineer

October 2024 – July 2026

Waabi · Toronto, Ontario

- Architected and delivered AI/ML applications that brought machine learning models and intelligent automation into production systems.
- Built LLM-powered applications and multi-agent workflows for data processing, decision support, and business automation.
- Owned ML pipelines end to end: data engineering, model experimentation, evaluation, and deployment.
- Implemented multimodal AI features combining text, image, and audio processing.
- Evaluated emerging AI technologies and established best practices that improved model performance and scalability.
- Led technical design discussions and set engineering practices for the team.

Senior Software Engineer, AI/ML

October 2022 – July 2024

BenchSci · Toronto, Ontario

- Led development of AI-powered software using Python, ML frameworks, and LLM services.
- Built NLP and predictive modeling features for intelligent automation and data analysis.
- Developed ML pipelines covering data preparation, training, evaluation, and deployment.
- Integrated generative AI capabilities into existing products.
- Reviewed technical implementations and guided engineers toward scalable designs.

Software Engineer

August 2020 – September 2022

BenchSci · Toronto, Ontario

- Built and maintained backend services and web applications supporting business operations and customer-facing platforms.
- Developed data processing modules and integrated external services.
- Resolved production issues and improved reliability through ongoing maintenance.
- Built reusable components and automated manual internal processes.

Software Engineer

August 2018 – May 2020

Tech Mahindra Ltd. · Toronto, Ontario

- Built web applications using Python, JavaScript, React, and modern backend frameworks.
- Designed and integrated REST APIs between frontend and backend services.
- Found and fixed bugs, optimized existing code, and improved application performance.
- Designed database structures and tuned SQL queries to support growing data volumes.

Software Developer

February 2017 – June 2018

Architech · Toronto, Ontario

- Developed and maintained web applications using Python, JavaScript, and React.
- Supported backend integration with frontend code.
- Debugged issues and contributed features with the development team.

EDUCATION

Bachelor's Degree, Computer Science

September 2012 – June 2016

Toronto Metropolitan University · Toronto, Ontario
